### **Bulletin No. 170 Series, "Abstracts of DWR Publications"**

Twice annually, the Department of Water Resources publishes its Bulletin No. 170, "Abstracts of DWR Publications". These reports are free. These reports contain abstracts of all Department of Water Resources technical bulletins published during the previous six months, a cumulative index to those abstracts, a price list of those bulletins published during the past five years which remain in print, and a list of libraries which shelve the bulletins. If you would like your name placed on the mailing list, write to Department of Water Resources, Attn: Reports Administration, P. O. Box 388, Sacramento, CA 95802.

In addition, you may wish to purchase Bulletin No. 170-69, "Abstracts of DWR Publications: 1922-1969". This report summarizes the 600-odd major engineering reports published by the Department of Water Resources and its predecessor agencies since 1922. It contains a complete subject index and lists the purchase price of those reports remaining in print. It is available, at \$5.00 a copy from: State of California, Documents Section, P. O. Box 20191, Sacramento, CA 95820. Residents of California should add 5 percent sales tax, thus paying \$5.25. This price includes shipping. Please make checks or money orders payable to STATE OF CALIFORNIA.

ABSTRACT

Climatological data are collected from 6,352 weather stations located in all 58 California counties, as well as in Oregon, Nevada, and Arizona, and in Mexico. These stations measure rainfall; some also report temperature and evaporation data. / The Climatological Master Station Index (Climat MSI) is recorded on magnetic tape by the Department of Water Resources in its Computer Systems Branch. The stations are described by name, by drainage basin, by their exact site according to the U. S. Public Land Survey, and by latitude and longitude, and their years of record are shown. The California stations are further identified by the county and the Department district in which they are situated. The names of the 90 cooperating agencies that supply this information are also listed. The master computer file is updated continually. / Climatological station data are published periodically for the use of all interested agencies and the general public. Earlier publications by the Department of Water Resources are two office reports: "Index of Climatological Stations in California, 1966", published in April 1966 and "Index of Climatological Stations in California, 1961", published in June 1961.

# MAJOR DRAINAGE PROVINCE and HYDROGRAPHIC UNITS

## INTRODUCTION

The measurement of precipitation is basic to intelligent planning of environmental modifications, such as those which involve enhancement of water supply and evaluation of potential flood hazards.

This issue of the "Index of Climatological Stations in California" is a compilation of 6,352 weather stations in California engaged chiefly in measuring rainfall. It also includes some stations situated in Oregon, Nevada, and Arizona, and in the states of Baja California and Sonora in Mexico. Some of these stations also report other types of data, such as temperature and evaporation. The information presented in the index results from the cooperative effort of 90 agencies whose records are listed.

Information published in the 1961 and 1966 editions of the index has been updated to assist local agencies in their data network planning. The main files of the Climatological Master Station Index (Climat MSI) are recorded on magnetic tape (by Process 268). Listings of the stations can be obtained in five standard alphabetic formats: by state, by district, by volume number of the Department's Bulletin No. 130 series\*, by county, and by drainage basin by district (using Process 309). The index has been compiled from records of the Environmental Data Service (formerly the U. S. Weather Bureau), the Department of Water Resources, and many other agencies, both public and private. The list of station names has evolved from three sources: 1) those used by the EDS in its "Climatological Data in California", 2) "Water Resources of California", Bulletin No. 1, published by the State Water Resources Board in 1951, and 3) "Flow in California Streams", Bulletin No. 5, published by the California Department of Public Works, Division of Engineering and Irrigation, in 1923. Data on geographic location is coded along with station names and numbers.

The index is kept current by using the Department's Computer Systems Branch's Process 268 to make corrections to the tape containing it. Revisions are taken from DWR Form 3222, which cooperating agencies use to advise the Department of new information. (Three blank sets of this form are provided at the back of this report.)

\* "Hydrologic Data", Bulletin No. 130, Volumes I - V, and Appendixes, published annually by the Department of Water Resources.

## KEY TO INDEX CODES

### Drainage Basin (Columns 1-3, Index Cards #1 and #2\*)

Each of the 12 major drainage provinces has a letter code and the areas within each have a number code. These are shown on Plate 1.

### Alpha Order Number (Columns 4-7, Index Cards #1 and #2)

The alpha order numbers were originally assigned to each station to denote its alphabetic sequence. They are the same numbers used by the U. S. Weather Bureau (the present Environmental Data Service) in the late 1950's. Alpha-numeric sequence numbers are now assigned by referring to the latest alpha listing of the historic weather station name list.

### Subnumber (Columns 8 and 9, Index Cards #1 and #2)

These numbers supplement the four-digit alpha order number and are used to maintain an alphabetical sequence of station names beyond the capability of the system reported in Climatological Data.

### Station Name (Columns 13-37, Index Card #1)

When no obvious station name exists, a name must sometimes be devised for a weather station. Frequently this is the name of the nearest post office, followed by the distance and direction in miles and 16 compass points. For example, Canby 11 SW denotes a station located 11 miles southwest of the post office at Canby. When two observers occur at a single location, the town name is sometimes followed by the name of the observer's location. An example of this: Stonyford Cooley Ranch, where Stonyford is the place name and Cooley Ranch is the observer's site. When two precipitation gages are situated at one site, one can be identified also with a number, such as Folsom No. 2.

The responsibility for selecting the station name rests with the agency or individual who establishes the station.

The space for station names is restricted by the computer to 25 columns; therefore, some abbreviations are necessary. Some common ones are:

AP - Airport  
PH - Power House  
STA - Station  
HMS - Highway Maintenance Station  
FS - Fire Station  
RS - Ranger Station

### Elevation (Columns 38-42, Index Card #1)

The elevation of the ground surface at the gage is expressed to the nearest foot above mean sea level (USGS datum). The elevation is generally obtained by interpolation between the contours of USGS topographic maps.

\* Refer to copies of DWR Form 3222 at the back of the Index.

Section, Township, and Range (Columns 43-50, Index Card #1)

The section, township, and range are based on the U. S. Public Land Survey, in which 6-mile-square townships are divided into 36 sections; these are further subdivided into 16 quarter-mile-square lots that contain roughly 40 acres. The township, range, and section used here are identical to those shown on the maps of the U. S. Geological Survey, with the official Department extension of the sectioning into unsurveyed areas.

40-Acre Tract (Column 51, Index Card #1)

A letter code identifies the position of each tract within a section. The letters "I" and "O" have been omitted to avoid confusion with the numbers "1" and "0".

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

40-Acre  
Tract

Base and Meridian (Column 52, Index Card #1)

The code for this column is:

- G - Gila and Salt River Base and Meridian
- H - Humboldt Base and Meridian
- M - Mount Diablo Base and Meridian
- S - San Bernardino Base and Meridian
- W - Willamette Base and Meridian

Latitude and Longitude (Columns 53-65, Index Card #1)

Latitude and longitude are given to the nearest second, when the value is known. The Environmental Data Service lists its stations by degree and minute only. A zero value or a blank space for seconds in these columns generally means that latitude and longitude have been obtained from the Data Service and have not been verified in the field by personnel of the Department of Water Resources.

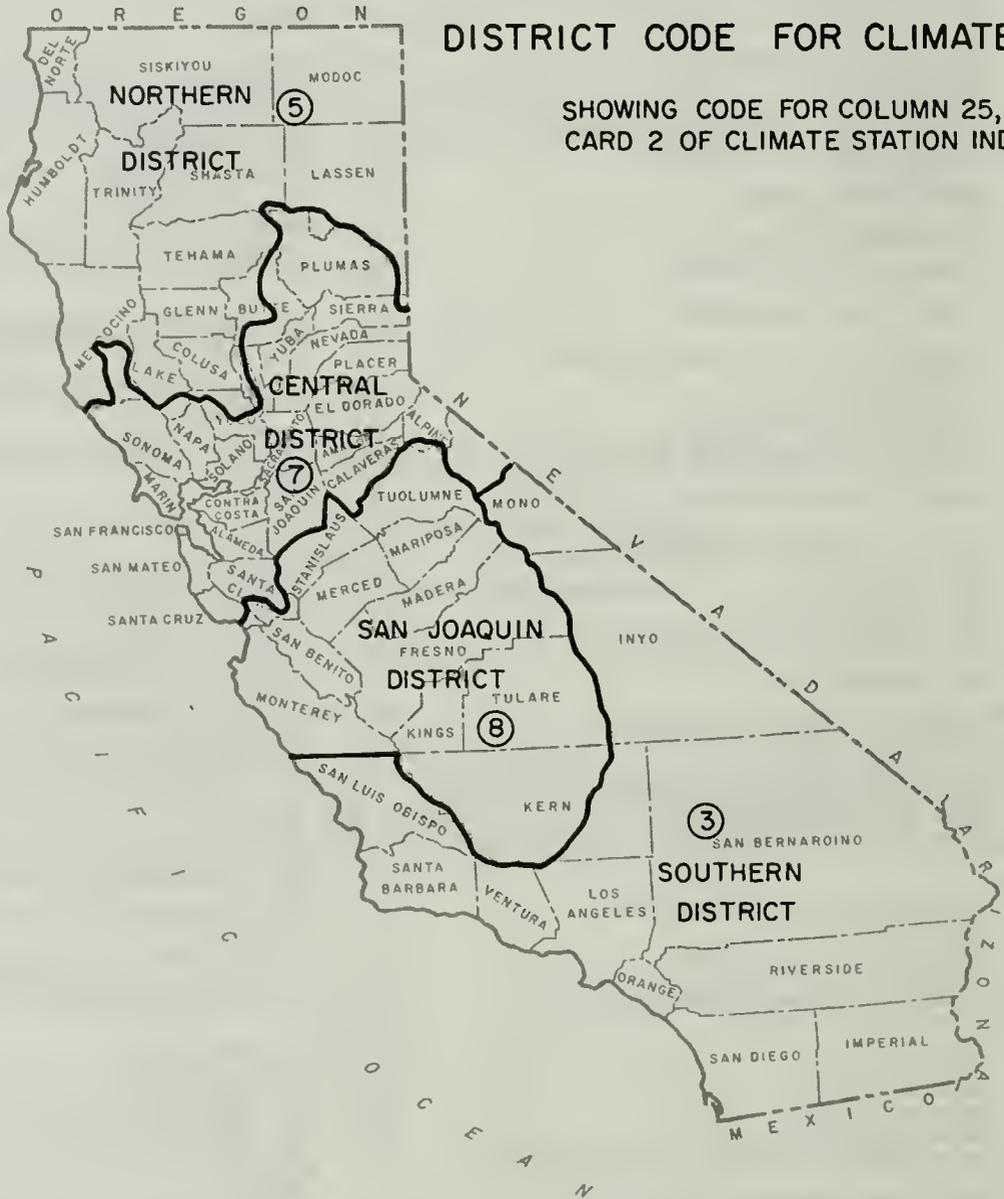

COOPERATOR NUMBER (Columns 66-68, Index Card #1)

This number is assigned from the following list

00 - Private Cooperators	431	Riverside County Flood Control and and Water Conservation District
01 to 399 - Private Agencies	432	Vista Irrigation District
001 Kern County Land Company	433	Helix Irrigation District
002 Boswell Company	434	Santa Barbara Water Department
003 Pacific Gas and Electric Company	435	Montecito County Water District
004 Southern California Edison Company	436	San Bernardino Water Department
005 California Electric Power Company	437	Imperial Irrigation District
006 Northwestern Pacific Railroad	438	Coachella Valley County Water District
007 California-Oregon Power Company (COPCO)	439	Unassigned
008 California Water Service Company	440	Sacramento Municipal Utility District
009 Stanford University		
010 Amateur Radio Weather Network KTRB	800 to 899 - State	
011 Southern Pacific Company	800	Northeast Counties Ground Water Investigation, Department of Water Resources
012 Miller & Lux, Inc.	801	Pomology Department, University of California, Davis
013 Central California Irrigation District	802	Irrigation Department, University of California, Davis
014 California Water and Telephone Company	803	Mariposa Area Investigation, Department of Water Resources
015 Escondido Mutual Water Company	804	State Department of Beaches and Parks
016 Temescal Water Company	805	State Department of Fish and Game
017 Gage Canal Company	806	Department of Water Resources, Land and Water Use
018 Foothill Lemon Company	807	Santa Barbara Project, Department of Water Resources
019 Fontana Union Water Company	808	Division of Forestry
00 to 799 - Counties and Municipalities	809	Division of Highways-Maintenance Stations
400 Alameda County Flood Control and Water Conservation District	810	Bureau of Plant Quarantine Inspection Stations
401 Hetch Hetchy Water District	812	Regional Subsidence Exploration, Department of Water Resources
402 San Francisco Water District	813	Department of Water Resources, Southern District
403 Sonoma County Flood Control and Water Conservation District	814	University of California, Davis, Westside Field Station
404 Oakdale Irrigation District	815	University of California, School of Forestry
405 City of Los Angeles, Department of Water and Power	816	University of California, Imperial Valley Field Station
406 City of San Diego	900 to 999 - Federal	
407 San Benito County	900	United States Weather Bureau (Climate Data)
408 Contra Costa County Flood Control and Water Conservation District	901	Corps of Engineers, San Francisco District
409 San Jose Water Works	902	U. S. Air Force, Air Weather Service
410 Los Angeles County Flood Control District	903	Corps of Engineers, Sacramento District
411 Marin County Engineer	904	U. S. Bureau of Reclamation
412 East Bay Municipal Utility District	905	U. S. Forest Service
413 Marin Municipal Water District	906	Agricultural Research Service
414 Santa Clara Valley Water Conservation District	907	State Climatologist
415 Orange County Flood Control District	908	U. S. Naval Post Graduate School
416 Ventura County	909	Soil Conservation Service, Watsonville
417 Metropolitan Water District	910	U. S. Weather Bureau, Fire Weather Punch
418 Vallejo Water Department	911	Military Weather Stations in California
419 Tehama County Flood Control and Water Conservation District	912	Sacramento Fruit Frost Cooperators
420 Stanislaus County	913	Corps of Engineers, Los Angeles
421 San Mateo County	914	U. S. Marine Corps, Camp Pendleton
422 Sacramento County	915	U. S. Weather Bureau (unpublished climate data), Washington, D. C.
423 Santa Cruz City Engineer	916	U. S. Geological Survey
424 Shasta County Department of Water Resources	917	International Boundary and Water Commission
425 Butte County Department of Public Works		
426 Santa Clara County Water Conservation District		
427 Monterey County Flood Control and Water Conservation District		
428 San Diego County		
429 San Bernardino County Flood Control District		
430 San Luis Obispo County Flood Control and Water Conservation District		

# DISTRICT BOUNDARIES DISTRICT CODE FOR CLIMATE INDEX

SHOWING CODE FOR COLUMN 25,  
CARD 2 OF CLIMATE STATION INDEX

Cooperator's (Coop's) Index Number (Columns 69-74, Index Card #1)

This number is assigned to the station by the agency which supplies this record to the Department.

Record Began, Record Ended, Years Missing (Columns 10-19, Index Card #2)

The index shows the calendar year in which each station first began recording and, where applicable, the year it ceased. Missing years of record are indicated so that the total years of record can be calculated.

County Code (Columns 20 and 21, Index Card #2)

The county in which each station is located is identified by a modification of the code used by the State Division of Highways. This code also includes designations of stations in adjacent states and some California stations whose county locations are not given.

Alameda	60	Marin	21	San Mateo	41
Alpine	02	Mariposa	22	Santa Barbara	42
Amador	03	Mendocino	23	Santa Clara	43
Butte	04	Merced	24	Santa Cruz	44

		Nevada	62	Mexico	64
		Arizona	63		

DWR District (Column 25, Index Card #2)

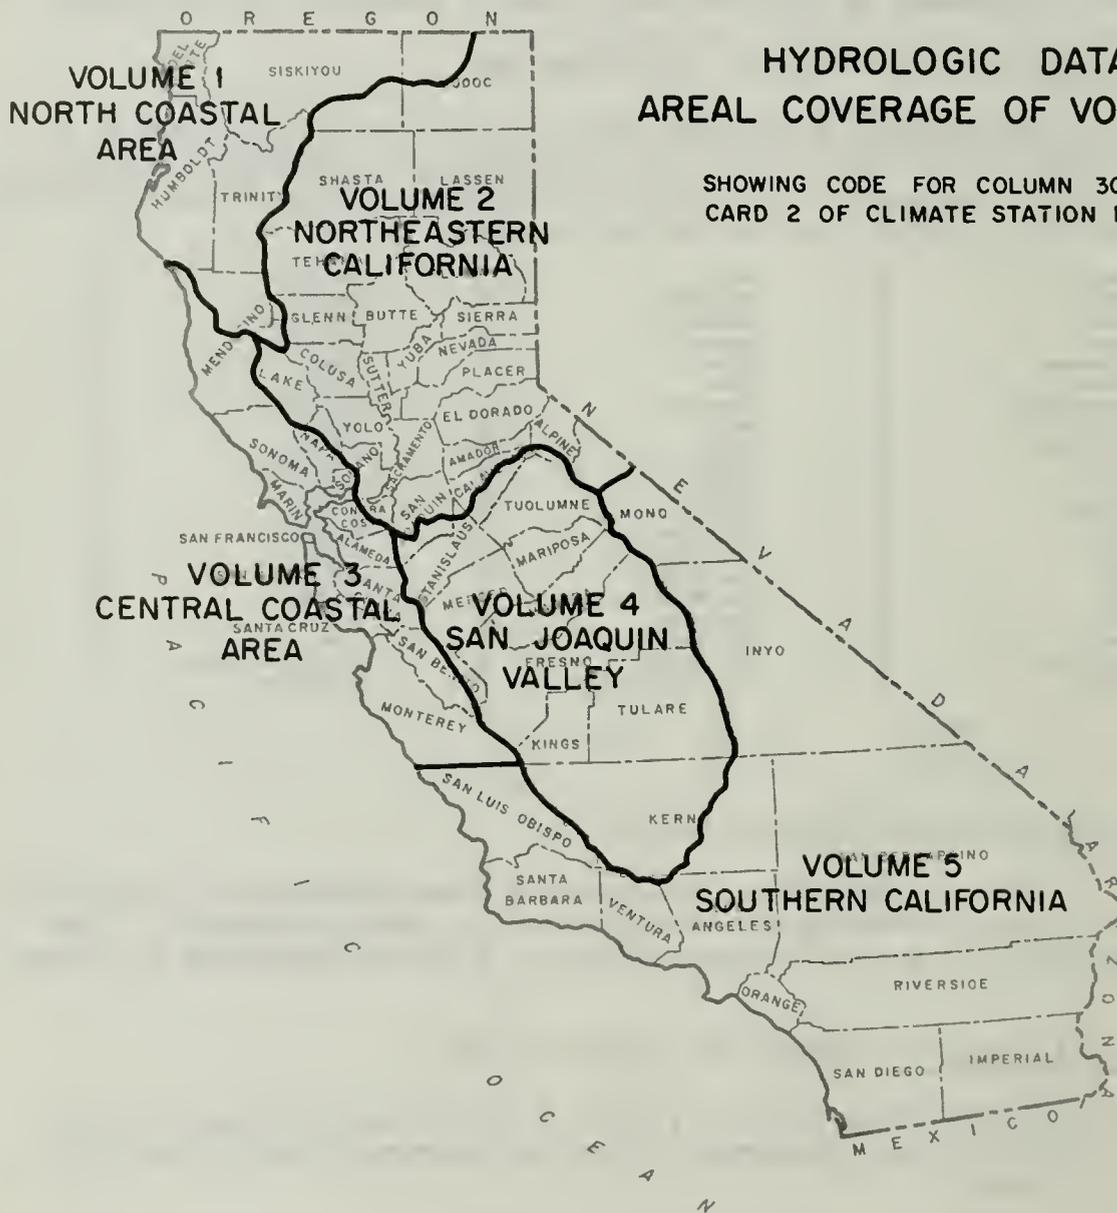

The districts of the Department of Water Resources are identified by the following code: 5, Northern District; 7, Central District; 8, San Joaquin District; and 3, Southern District. District boundaries are shown on Plate 2.

Bulletin 130 Vol. No. (Column 30, Index Card #2)

The Bulletin 130 volume is identified by a number that corresponds to the number of the volume. The areas of the State covered by each volume are shown on Plate 3.

Update Code (Column 75, Index Cards #1 and #2)

The update code is one of the more important sources of information used in revising the entries. An "A" is entered in the column when a new station number and subnumber are added; a "C" is entered for corrections and a "D" for deletions.
